

Product Information

Page & Layout Designer is a great choice for all your DTP and document creation needs.

Page & Layout Designer combines all the text and page layout features of typical word processor and DTP packages with the image editing power of our illustration and photo editing tools, based on decades of experience creating graphic design products. The result is a fully integrated, flexible and powerful 'Document Processor' that can be used to create all the documents you need for your home or business.

- Business cards • Flyers • Brochures • Posters • Adverts • Business stationery (letterheads, compliments slips, invoices, statements) • Menus • Logos • Price lists • Greetings Cards • Certificates & awards • Newsletters • Invitations • Scrapbooks • Web documents • Reports

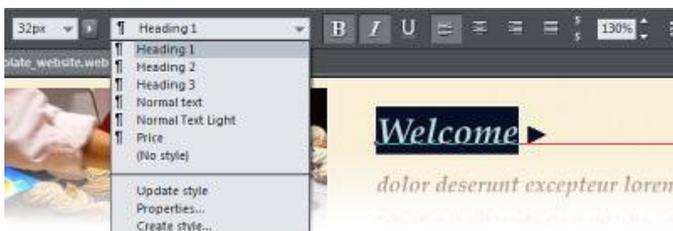

Powerful text handling

Page & Layout Designer offers everything you need for manipulating text.

You can enter your text at any angle and you can also set your text along a curved path. Additionally, just like any drawn object in Page & Layout Designer, you can freely resize it on the page, and produce creative display text by applying any of the effects, such as transparency, fills, molds and so on - and yet the text remains editable.

Like any word processing program, you have full control over the text style and format - you can change the font, size, color and justification of the text, alter the line spacing, tracking and kerning, and have bold, italic, superscript, subscript or strikethrough. You also have full control over indents and tabs and you can easily create bulleted or numbered lists (with your own custom bullets & numbers if you wish).

your solution for professional print documents

Product Information

Text can be entered as stand alone single words or lines at any place in the document, or in single or multiple columns with advanced text flow controls between the columns, and with formatting controls such as column and page breaks.

And there's an added bonus; Xara's advanced screen rendering makes the on-screen text a more accurate representation of the final print result, especially at small sizes or rotated.

HIGHLIGHTS

- Integrated multi-language spell check • Text styles • Direct support for 600+ Google fonts • Easy embedding and anchoring of graphics in the text

Flexible & intuitive page handling

Page & Layout Designer offers everything you need for professional DTP, combining advanced text controls with flexible page layout features such as drag and drop editing of images and automatic text flow around objects. It adds up to complete design freedom for all your page design work!

Page & Layout Designer is great for single page designs such as business cards or adverts, but it can also handle more complex multi-column, multi-page documents with ease, with automatic flow onto new pages, automatic page numbering, single page or cross-document control of headers & footers, and very flexible controls over text flow between columns. With multi-column layouts you can switch column count and customize columns individually, have a common multi-column layout throughout the document or individually designed pages. And you can have single page or seamless double page spreads supporting across-the-spread graphics.

HIGHLIGHTS

- Magic Snap makes aligning objects easy • Automatic text flow around objects • Page & Layer Gallery for easy management of your document

Integrated drawing & photo tools

For any document, laying out your text professionally is just half the battle. To present ideas or businesses successfully you also need images that create a professional impression. The image editing features in Page & Layout Designer allow you to do exactly that, quickly and easily.

With the fully integrated photo tool you can easily crop your photo and adjust brightness, contrast, color temperature, saturation and sharpness, so you can transform your photos in no time at all, either manually or with the 1 click auto-optimization.

Page & Layout Designer offers all the tools you need to create

XARA PAGE & LAYOUT DESIGNER 9

Product Information

your own graphics and illustrations for your document. These are taken from Xara's award winning illustration products, which means they're among the best in the industry - including freehand and shape drawing tools and powerful tools for creative effects such as bevel, shadow, mold, transparency, 3D and color fills.

HIGHLIGHTS

- Non destructive photo editing
- Small file sizes
- Fully integrated award winning illustration and design tools

Web Documents

Page & Layout Designer is the first DTP program that enables you to publish a perfectly accurate WYSIWYG web version of your print documents, compatible with all modern web browsers, phones and tablets, no plug-ins required.

By producing a completely accurate paginated 'long document' phone and tablet users can quickly swipe through all the pages. If you want to share documents with friends, colleagues or customers, confident that they'll see an accurate copy of your document, you no longer need to create and send PDFs - you can just publish to the web (free hosting included).

Templates

Page & Layout Designer offers all the tools you need to create your documents from scratch, but it is also packed with ready-made, fully customizable templates to suit all your business needs, allowing you to quickly create professional looking documents. Templates including stationery sets, brochures, flyers and newsletters, cards & invitations.

Compatibility with industry standards

Page & Layout Designer offers comprehensive support for industry standard import and export formats, so you can import existing graphics and documents.

This includes RTF (Rich Text Format) and (beta) import and export of Microsoft Word (.docx), plus all the common bitmap graphics formats such as GIF, JPEG, PNG and PSD, and key vector types like PDF, EMF, WMF and SVG.

your solution for professional print documents

Product Information
